

Integrated Approach to Proxy Voting

We are long-term investors, with an average holding period of 7+ years. We believe that strong, ethical management, and good governance drive long term business value creation.

Proxy voting is an important mechanism with which to strengthen governance and accountability. Our proxy voting process is unique, and reflects the level of importance we place on governance and our role as stewards of client capital.

Key Attributes of Our Process:

- Equity research analysts are responsible for reviewing and recommending all proxy votes
- Each proxy is discussed with the Investment Strategy Committee (ISC)
- Decision are made by the investment professionals
- Engagement, when necessary, is led by the research analysts

Ultimately, we believe this leads to deeper integration of ESG factors within our investment process. Our preference is for engaged dialogue with management, and if necessary boards of directors, in order to improve governance and business practices. For this reason, we have been viewed as a credible shareholder, with whom managements seek counsel.

Our Independent Point Of View Is Reflected In Our Voting Statistics

Our voting statistics are well above industry averages. While we saw a slight decrease in the number of instances in which we voted against management over the last period, this is in part driven by improvements or changes that have been implemented as a result of prior engagements, and in part due to changes in underlying holdings. Our voting trends are further explained on the next page.

Compensation

Compensation continues to be our most active area of engagement. Appropriate compensation that is linked to long-term business value creation—not short-term stock movement—is the most powerful tool Boards have to drive management and stakeholder alignment. In 2018, we voted on 94 compensation packages (“Say-On-Pay”), and opposed 43% of them based on a variety of reasons, from poor performance alignment or high options dilution to simply excessive absolute pay levels. This compares to an average dissention rate of just 7.5% in the market. Additionally, we will also vote against members of the Compensation Committee if we did not see meaningful progress year-over-year. In 2018, we opposed 20% of Director nominations, a significant portion of which were driven by compensation matters. While still well above market averages (3%), this is a reduction from approximately 26% in 2017, reflecting in part the ongoing adoption of best practices by portfolio holdings in these areas. For example, in 2018, we adjusted our vote to support Manulife’s compensation plans, following extensive engagement that resulted in better alignment between performance and compensation.

Shareholder Proposals

As described in our Proxy Voting Policy, we take a principles-based, not rules-based, approach to assessing shareholder proposals. Rather than prescribing specific behaviors, we prefer proposals that focus on driving accountability and creating feedback mechanisms on matters material to our investment thesis. In 2018, we supported 35% of 129 shareholder proposals—this was up from 22% in 2017.

Areas of focus include items such as requests for the Board to implement a **Say-On-Pay vote**, **Separation of Chair and CEO**, and the right for Shareholders to call **Special Meetings**, where we have supported judicious shareholder proposals. We are increasingly supporting well-written proposals that make requests for action or disclosure that are non-proprietary and material to our investment thesis and assessment of the long-term resilience of a business. Several **climate-related proposals**, in conjunction with our own analysis and engagement, became more actionable and useful in making investment decisions. For example we supported proposals at Noble Energy after engaging with the company and observing that requests were becoming more focused on higher level TCFD-like disclosures and topics more likely to inform our investment thesis. **Lobbying disclosures** is another area where we have become more comfortable with the value of requests and have increased our support, especially in industries where this activity is more likely to be relevant to our long-term assessment.

As evidence of our thoughtful approach to proxy voting, we do not support vague or misplaced resolutions, however well-intentioned they are. For example, a recent proposal at Alphabet requested a report on “risks to the company associated with emerging public policies on the **gender pay gap**”. We believe the vaguely worded proxy resolution overlooked Alphabet’s comprehensive strategy (and disclosure) in this area, and did not support the proposal. While we concur that access to talent is a key factor in the sustainability of innovation and thus growth, and fair treatment of all employees is increasingly a public issue, Alphabet has a credible, evidence-based plan to address these issues and uses its industry-leading analytics and artificial intelligence capabilities to find and address gaps in pay and seniority. This is reassuring considering the company’s need to attract and retain the best and brightest graduates and seasoned professionals in a highly competitive environment.

We did, however, support a shareholder proposal at Alphabet that requested the company “Assess Feasibility of Including **Sustainability as a Performance Measure** for Senior Executive Compensation”. Incorporating sustainability metrics into compensation seems like an interesting way to get companies thinking long term, and is perhaps an important tool towards embedding sustainability in Governance. This has historically not been an issue with Google, a very forward-thinking company, but we were intrigued by the prospect of such an innovative and data-driven company tackling a tricky problem such as finding the right way to measure and reward “sustainability”. An important element as well was that the resolution was not prescriptive, and did not insist that sustainability criteria be incorporated, but merely assessed.
