

A Focus on High Quality Global Leaders

The International Equity portfolio is comprised primarily of large multinational companies that demonstrate global leadership in their industry. They generally have steady growth rates, high returns on invested capital, dominant world market positions and strong balance sheets, reducing their financial risk. Our approach targets non-cyclical international companies in developed (excluding U.S.) and emerging countries that benefit from exposure to economies typically growing at a rate higher than global GDP.

Jarislowsky Fraser integrates the analysis of material Environmental, Social and Governance (ESG) factors into our bottom-up fundamental analysis and investment decision-making process. We believe assessing investable companies through an ESG lens helps to gauge their quality, furthering our ability to invest in the most sound companies.

The strategy is available as a separate account holding local shares, a commingled fund or as an account holding only ADRs.

PORTFOLIO CONSTRUCTION

- Market capitalization > \$1B; EM market capitalization > \$500M.
- Non-index emerging market limited to 10% weighting; non-index emerging country limited to 5% weighting.

SUSTAINABLE INVESTING

At Jarislowsky Fraser, sustainable investing is about widening the analysis beyond short-term profit, to favor factors that support long-term value creation. Our view is that a company's Environmental, Social and Governance (ESG) policies and track record are likely to be a helpful lens through which to gauge quality. For this reason, we integrate the analysis of material ESG risks and opportunities into our investment process, and have adopted a Sustainable Investment Policy that formalizes our commitment.

Integration of ESG considerations is a component to our assessment of quality across all of our mandates. In addition, for clients with specific values-based restrictions, or other investment policy considerations, the firm offers a tailored approach to meet their needs. We presently manage over \$2.2 billion USD on behalf of clients with a variety of unique values-based restrictions and recently launched Fossil Fuel Free Funds.

ENGAGED OWNERSHIP APPROACH

Acting as long-term stewards is our fiduciary duty and can be an opportunity to add value for shareholders. We seek constructive engagement with company management, and in some cases with Boards of Directors, on material business concerns including ESG issues. We believe that Jarislowsky Fraser has historically been viewed as a credible shareholder from whom managements seek counsel. This is further reinforced in our proxy voting decision-making:

- Proxy voting is fully integrated into our investment process;
- Our global investment team meets to consider each proxy;
- Decisions are made in-house by the investment professionals.

Our independent point of view is reflected in our voting statistics. Over the 12-month period ending June 30, 2018, our firm voted on more than 2,500 proposals and agenda items in over 30 countries. Our independent point of view is reflected in our voting statistics. For example, of the total proxy meetings during the year, we had at least one point of distinction from management recommendations in 58% of the meetings.

KEY ASSOCIATIONS

INVESTMENT STRATEGY – Q4 2018

In the last quarter, we continued to see a variety of political events which served to unnerve and test even the most resilient investors. While the U.S. midterm results came out largely as expected, but the prospects of further discord in Washington provided caution and was manifested in the largest government shutdown. Meanwhile, in the UK the situation surrounding Britain's exit from the Eurozone continued to play out with no clear solution. Trade tensions continued between China and the U.S., although there appears to be some mutual desire to iron out a lasting solution.

As discussed in previous reviews, the removal of excessive monetary stimulus globally has brought with it, increased volatility in the markets. While daily market swings can be alarming at times, it is important to remember that equity is an ownership in a real business with attractive long-term potential to earn returns above its cost of capital. For a patient long-term investor, these carefully chosen businesses can provide attractive long-term risk adjusted returns, which will thrive in a variety of economic scenarios. Within this context, we believe Jarislowsky Fraser's high quality/low risk approach provides superior downside protection, while benefitting when the markets turn upwards. The current volatility also provides excellent opportunities to acquire quality securities at better valuations, and ultimately increase potential gains.

INVESTMENT TEAM

Jarislowsky Fraser has a team-based approach that anchors a culture of collaborative decision-making. The Investment Strategy Committee (ISC), our central risk and investment oversight body, oversees the entire investment process to ensure that investment decisions adheres to the firm's long-standing philosophy and process.

¹ Strategy size includes assets in both the International Equity EAFE and EAFE Plus composites; separate accounts outside these composites; and International ADR and All Countries ex-US strategies.

² Portfolio characteristics are based on the International Equity EAFE Plus composite; except for Turnover, Yield and Capitalization, which are based on the representative account JFL International Equity Fund LLC. Data is for 7 years. Turnover is an average of last 7 calendar years to 12/31/18. Sharpe Ratio was calculated using the Citi 3 Mo. T-Bill. ³ Net-of-fees composite returns are calculated by deducting the maximum fee charged from the gross-of-fee return. ⁴ Prior to January 1, 2016, the benchmark was the MSCI EAFE Gross. The benchmark returns are calculated net of withholding taxes. ⁵ Data based on the JFL International Equity Fund LLC.

The International Equity EAFE Plus composite is made up of actual, fee-paying, discretionary portfolios with a market value of over \$5 million CAD. Past performance does not guarantee or indicate future results. The performance information shown reflects the performance of composites of accounts and does not necessarily reflect the performance that any particular account investing in the same or similar securities may have had during the period. Actual account performance is likely to differ from the composite performance shown for a variety of reasons, including but not limited to: differences in market conditions, portfolio turnover and in the number, types, availability and diversity of securities that can be purchased; economies of scale, regulations and other factors applicable to the management of large separate accounts and mutual funds, client-imposed investment restrictions, the timing of investments and cash flows, the deduction of taxes, and other factors. All opinions and estimates contained in this report constitute JFL's judgment as of the time of writing and are provided in good faith. All data, facts and opinions presented in this document may change without notification. No use of the Jarislowsky, Fraser Limited name or any information contained in this report may be copied or redistributed without the prior written approval of JFL.
